

Profile

Thursday, June 7, 2018 6:56 PM

Maven profile

- Build profile
 - Set of configuration values
 -
- Customize build for different environments

```
<profiles>
  <profile>
    <id> Sample </id>
  </profile>
</profiles>
```

Maven doesn't read anything inside the profile
unless the profile is invoked

Example

mvn compile -P Sample
